¹ Due to the requirements of the program used to create the codebook, some variables follow a different naming convention in the codebook and data files. Variables in the questionnaire and data files in the form varname_x, where x=1, 2, 3, etc., have the form varname.0x where x=1,2,3, etc. in the codebook. Similarly, variables in the form varname_xmo and varname_xnu in the data files have the form varnamemo.0x and varnamenu.0x, respectively, in the codebook.

Descriptive statistics were automatically generated for those variables with amounts. Several questions collect information about amounts in different units, periods of time, currencies, etc. Descriptive statistics for these variables won't provide a good description of the data and further calculations will be needed.

We would now like to know what you think people in various jobs actually earn in the United States. Please state how much you think workers usually earn, each year, before taxes. Many people are not exactly sure about this, but your best guess will be close enough. This may be difficult, but it is very important, so please try. Please estimate in US dollars how much each worker actually earns per year before taxes. / FOR X=2: We are also interested in what you think workers in these jobs earned in your country of last residence just before you came to the United States. Please make your estimates in the currency of that country. How much do you think each worker earned per year in your country of last residence before taxes?]

An unskilled worker in a factory
